SUMMARY

Aspiring Software Engineer with a strong focus on Artificial Intelligence and solid programming and problem-solving skills. Experienced in full-stack development, with hands-on work in AI-driven applications, web systems, and containerized environments. Seeking to contribute to innovative, product-oriented teams that value continuous improvement.

EDUCATION

Dayananda Sagar Academy of Technology and Management, Bengaluru **2023 -2027**
B.E in Computer Science and Engineering (Artificial Intelligence) CGPA: 8.53
Vijaya Composite PU College, Bengaluru **2022-2023**
XII (PUC) Percentage: 87.5%
Vijaya High School, Bengaluru **2021**
X (SSLC) Percentage: 85%

SKILLS

Programming: Python, C
Web: HTML, CSS
AI/ML: Machine Learning, Computer Vision
Databases: SQL
Tools: Git, GitHub, Docker, VS Code
Core Concepts: Data Structures, OOP Basics, APIs
Soft skills: presentation, communication, networking, teamwork, leadership

PROJECTS

Student Management System (Project)

Developed a Developed a full-stack Student Management System using Spring Boot and PostgreSQL with RESTful APIs for managing student records and academic details. Implemented CRUD operations, validation, exception handling, and database integration using a layered architecture with Controller, Service, Repository, and Entity modules.

Tech Stack: Java, Spring Boot, REST API, JPA/Hibernate, PostgreSQL, Maven, Eclipse IDE

Multimodal Muscular Dystrophy Detection System (Patent Filed)

Supported documentation of the EMG signal acquisition workflow and hardware sensor configuration – Analyzed system architecture combining adaptive electrode arrays with inertial and pressure sensing modules – Explored ML-driven diagnostic pipelines including CNN-based classification techniques – Contributed to patent drafting support and validation documentation.

Driver Drowsiness Detection System (Learning Project)

Developed a learning-based project focused on detecting driver fatigue using computer vision techniques, implementing facial feature and eye-state analysis for real-time drowsiness detection while gaining hands-on experience with image processing, machine learning concepts, and system workflow including data processing, detection logic, and alert generation.

Tech Stack: Python, OpenCV, Computer Vision, Machine Learning

CERTIFICATIONS

- Deep Learning, NPTEL (IIT Ropar), 10/2025
- Oracle Cloud Infrastructure Foundations, Coursera / Oracle, 04/19/2025
- Cloud Computing Fundamentals, IBM SkillsBuild, 05/13/2025
- Oracle SQL Performance Tuning, Coursera / EDUCBA, 11/19/2025

ACHIEVEMENTS

- Co-Inventor of **Patent Filed** on Multimodal Muscular Dystrophy Detection System.
- Authored and presented a research paper at the International Conference **Advanced Multidisciplinary Innovations in Science & Engineering for Industry 5.0 (AMISE 5.0)**.
- Participated in **Hackathons**, **Ideathons and Technical Innovation Challenges.**
- **NCC Cadet** with strong discipline, leadership, and teamwork skills and **Represented and competed** in **Kabaddi** at the inter school level.
